

Annual Report

See the impact the donors
of the Dobra Fabryka Foundation
have made around the world

The Good We Create Together

Fundacja Dobra Fabryka, an independent Polish humanitarian and development organization, is guided by the belief that **every life matters**. Since 2014, we have been working tirelessly to bring hope to those who need it most. We feed, treat, educate, and provide work opportunities.

For us, humanitarian aid is not about statistics and reports — it is about people. It is a mother fighting to feed her child. It is a doctor in a war zone, saving lives with the last available resources. It is a girl whose dream of education is held back by family poverty.

We work for them. They inspire us.

Over the past 11 years, we have expanded our reach **across three continents**, delivering life-saving assistance in conflict zones, disaster-stricken regions, and communities living in extreme poverty.

During this time, thanks to the support of people committed to our mission, **we have reached over 600 000 individuals** whose names and stories we know personally, delivering assistance worth more than €7 925 080.

We believe that real change begins where people help people. **We believe in action — where others do not reach.** In standing alongside those the world has left behind. **In the conviction that no one should be just a number in a statistic.**

Our work is only possible thanks to those who believe in the power of good.

Whether you support us with a donation, a partnership, or simply by sharing our story with others—**you are part of this movement.**

Together, we are more than an organization. We are a true factory of good.

What we do

We deliver life-saving food to people suffering from hunger and malnutrition.

We provide urgent medical care and supplies to hospitals and health centers, including in conflict-affected areas.

We enable access to education and employment, helping people rebuild their futures.

We support local communities by giving them the tools to regain independence.

Hope Starts with You

An African proverb says that **when elephants fight, it is the grass that suffers most.**

In the past year, the **world has once again been shaken by the sound of bombs** and the cries of people fleeing war. Ukraine, Lebanon, Iran, the Democratic Republic of the Congo — more and more **places where we have been working have turned into scenes of war.** We have witnessed burned homes, mined farmland, and children for whom the sound of passing aircraft brings paralysing fear. The great elephants trample the grass without thinking. **Every war**, though it begins in palaces and offices of different shapes, ultimately **affects ordinary people.**

Among the picturesque hills of western Rwanda, where the wounds of 30 years ago have still not healed, we met **Jikaze**. He was three years old, with the eyes of an old man, when hunger and suffering took away his strength to look at the world. If not for the encounter with **dedicated missionaries** and Dobra Fabryka, he would not be with us today. Now he is learning to smile again, to play, discovering new tastes, and enjoying food more each day. **Encounters like this give meaning to our work.** They remind us that even where the world turns to ruins, **goodness can still save a human life.**

Dobra Fabryka exists precisely **to stand close to those who find themselves under the crushing weight of history.** Thank you for another year. See how much good has been made possible in the world thanks to you.

Thank you for being with us.

Greece

Aid for Refugees on the Island of Lesbos

SINCE
2019

Home for All is a community kitchen run by **Katerina and Nikos**, who have been **supporting refugees** on the Greek island of Lesbos **for the past 10 years**. Free meals are prepared here for the residents of the camp.

Nutritious, well-balanced **meals for the sick, people with diabetes, and pregnant women** are made using fresh, organic vegetables from our garden.

In 2025, Home for All prepared and **delivered 73,502 meals to people in need**. The meals were prepared with the help of volunteers and refugees taking part in a training program, where they **learned how to work in a professional kitchen** and operate catering equipment.

Thanks to these new skills, **they will have the opportunity to find employment in restaurants in the future**.

In 2025, two participants, one from Somalia and one from Sierra Leone, reached **a level of competence that allows them to work independently** in the kitchen and are now ready for permanent employment.

Over the course of the year, **650 people from the refugee camp visited our farm** in organized groups, **spending several hours in a welcoming environment**. We invite them to share **a meal** at a common table so **they can feel important and seen**. Before returning to the camp, each group receives **fresh produce from the farm**. We believe that even such a simple gesture can restore people's dignity, hope, and sense of community.

In addition to ready-made meals, we also **delivered fresh vegetables** from our farm **to the camp**. Altogether, **nearly two tons of produce** reached those most in need, including hundreds of kilograms of lettuce, cauliflower, zucchini, eggplants, melons, and peppers.

We also help in crisis situations by covering **the costs of medicines, doctor visits, and basic medical tests**.

**Empower
a Refugee**

[dobrafabryka.pl
/en/village](https://dobrafabryka.pl/en/village)

On the Greek island of Lesbos, we created a place that **turns emergency aid into a real chance for a new life**. Home Village is a farm where **people with refugee experience can find work, learn how to cultivate the land, and regain a sense of independence**.

What began as a small project has grown into **a thriving social enterprise, providing stable employment to 28 people in 2025**. Thanks to the support of the donors of Dobra Fabryka, the farm expanded **by another 2 hectares of land**.

Today, the cultivated land already covers **a total of 7 hectares**. A modernized irrigation system, animal breeding, and investments in organic farming allow us to produce food in a way that **respects the local ecosystem**. We use **sustainable farming practices**, taking care of soil fertility, reducing resource consumption, and relying on natural cultivation methods. Thanks to this, the farm not only provides a stable **source of healthy food**, but also helps build **the long-term self-sufficiency of the project**.

Each harvest is more than just an organic product. It is proof that humanitarian aid can grow into **lasting development**, and that investing in people's potential can **build bridges where others see only borders**.

Greece

Behind the Scenes

Greeks and refugees working together to host the diplomats.

Our pride

A tasting of NIKA olive oil, produced by refugees using local olive varieties.

The Polish Presidency and 27 Trees of Peace at Home Village

On April 4, 2025, Home Village became **the diplomatic heart of Europe**. At the initiative of the Embassy of the Republic of Poland in Athens, and as part of Poland's presidency of the Council of the EU, our farm was visited by **27 ambassadors and high-ranking diplomats from European Union member states and associated countries**. The event showed that the integration model developed by the Dobra Fabryka is seen as an important example of modern development aid.

The visit was both deeply meaningful and symbolic:

- **The European Olive Grove:** Together with the diplomats, we planted the European Olive Grove. The 27 olive tree saplings became a living symbol of solidarity and peace, reminding us that Europe, through its representatives, is capable not only of looking in the same direction, but also of truly standing alongside people who have found themselves in dramatic circumstances. The fruit of these trees will help rebuild peace and create opportunities for a dignified life for many refugees wounded by life's hardships.

Dialogue at the Shared Table

The meeting between diplomats and Home Village staff created an opportunity for direct conversations about the challenges faced by refugees.

Shared Roots

The 27 trees planted by the ambassadors are a living symbol of unity.

Community

Gerda Vogl, Ambassador of Austria (until 2025), planted one of the 27 trees in the European Olive Grove.

- **NIKA olive oil, the fruit of dignity:** The guests saw how our farm workers, both refugees and local residents, care for the olive trees every day and press oil from their fruit. This is where NIKA olive oil is made, restoring a sense of agency to people who have lost everything.
- **Dialogue at the shared table:** Thanks to your support, we were able to welcome our guests in the new covered area next to the kitchen. A shared meal prepared with produce from our farm became an opportunity to build bridges across borders and languages.
- **Professional infrastructure:** The ambassadors also visited the renovated storage building, where, following a complete roof renovation and wall insulation, we installed the machinery used for olive oil production.

500-year-old olive trees

We draw on the island's olive
wealth to fund support for refugees
trying to rebuild their lives.

Greece

Olive oil production

WE PROVIDE
JOBS

SINCE
2023

There are **more than 11 million olive trees** growing in the olive groves of Lesbos. The oldest of them are **600 to 700 years old**.

They grow in poor, rocky soil, exposed to strong sea winds and a chronic lack of water. This daily struggle for survival forces the trees to produce **huge amounts** of protective compounds, especially **polyphenols**.

What would be considered a disadvantage in industrial farming becomes **an asset** here. Environmental stress forces the trees to reach deeper for **water and minerals**, resulting in a more intensive production of these **precious compounds**.

The result? The average olive oil found on supermarket shelves contains only 50-250 mg/kg of polyphenols. **NIKA olive oil exceeds 470 mg/kg**.

The high concentration of polyphenols gives the oil its distinctive, **pleasantly peppery taste** and slight **tingling sensation in the throat**. This is not a flaw, but proof that **the active compounds are alive and working**. Polyphenols also act as a natural preservative, protecting the oil from oxidation, which allows it to retain its freshness and **valuable properties** much longer than ordinary olive oils.

NIKA is made exclusively **from two rare olive varieties endemic to Lesbos**: Kolovi and Adramytiani. Kolovi brings delicacy and a pronounced fruity aroma, while Adramytiani adds depth, herbal notes, and refined sharpness. The aroma is dominated by the island's fresh herbs such as oregano, thyme, and rosemary, balanced by notes of green tomatoes and freshly cut grass. Its exceptional quality was confirmed with the **silver medal** at one of the world's most prestigious competitions, **the Japan Olive Oil Prize in Tokyo**.

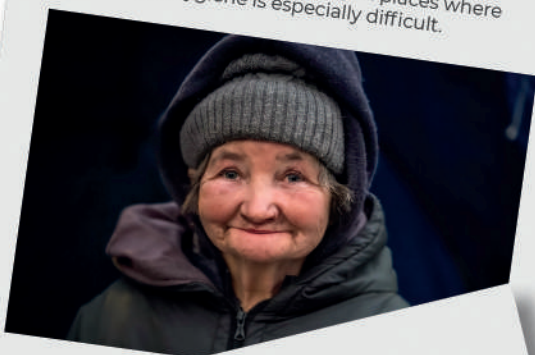

Poland

Warm Package for people in a homelessness crisis

SINCE
2018

Clean Package

Alongside the Warm Packages, we also provide women with basic hygiene products. These are items that help preserve dignity in places where maintaining hygiene is especially difficult.

December 2025

We provided support to people in crisis who were unable to access shelters or other intervention centers due to having a pet.

During the 2025/2026 winter season, as part of the “Warm Package” campaign, **we reached more than 60 people experiencing homelessness.** In **cooperation with the City Guard**, we assessed needs in over 30 locations across Warsaw.

We distributed **50 specialist aid packages** containing blankets, sleeping bags, winter clothing, and footwear. During **30 emergency patrols**, we also handed out **more than 150 self-heating meals.** Our efforts helped protect the most vulnerable people who were at risk of the tragic effects of freezing temperatures.

We allocated

€5 255

to support people experiencing homelessness in Warsaw.

Cooperation with the City Guard

We take a coordinated approach. Together, we identified and secured more than 30 locations across Warsaw

Gift a Warm Package

dobrafabryka.pl/en/warmpackage

Effective interventions and saving lives

Our work is not only about providing **material support**, but above all about **saving lives**. Since October, we have carried out more than 30 emergency patrols, during which:

- We rescued people **suffering from critical hypothermia**, working directly with emergency medical services.
- We provided **shelter and medical care** to specific individuals, including Marek and Mirek at the House of Our Lady of Compassion as well as Jan at the center on Żytunia Street.
- We provided **medical aid** to Klaudia, Mariusz, Andrzej, and Liliana in cooperation with the Heart Ambulance.
- We supported people in their journey out of homelessness by referring them to **transitional housing** in cooperation with the Fortior organization.

Ukraine

SINCE
2022

Humanitarian aid close to the frontline

WE FEED

WE TREAT

The war in Ukraine is a **daily reality marked by air raid sirens** and power outages lasting up to 16 hours a day. **Since February 24, 2022, Dobra Fabryka has been on the ground, bringing help where it is needed most.** We are not just an organization. We are a sign that no one should be left alone in the face of unimaginable pressure.

In 2025, we continued our mission guided by a simple principle: **responding to real needs with dignity and care.** As entire systems were pushed to the brink, we supported 10 critically important medical facilities in the Dnipropetrovsk and Zaporizhzhia regions. We delivered **more than 50,000 medical supplies**, medicines, and life-saving equipment, including **power stations and defibrillators**, so that doctors could continue operating even after missile attacks.

Thanks to your support, **we reached people the world too often forgets.** We launched **medicine voucher programs** in the Dnipropetrovsk and Kharkiv regions, supporting **more than 1,700 people living with disabilities and chronic illnesses.**

More than **10,000 prescribed medications** reached **chronically ill people living near the front line**.

For many of them, this meant returning to treatment, reconnecting with their doctors, and regaining a sense of dignity.

Beyond direct aid, we also played a key role in “connecting the dots.” We developed **a unique Referral Tool** that allows humanitarian organizations to safely transfer beneficiaries between one another, ensuring that **support remains coordinated and that no one falls through the cracks**.

We also launched the Emergency Fund, a unique initiative supporting local Ukrainian organizations that **continue helping civilians every day** despite exhaustion and constant power shortages.

All of this is far more than numbers.

It is real help for real people.

Thanks to you, a doctor in Zaporizhzhia had electricity to save lives, and an elderly person near Kharkiv received essential medicines. **Thank you for believing that even in wartime, support can remain coordinated, dignified, and truly human.**

Dobra Fabryka

We were one of the first organizations to cross the border into Ukraine to help those affected by the conflict.

Ukraine

Humanitarian aid close to the frontline

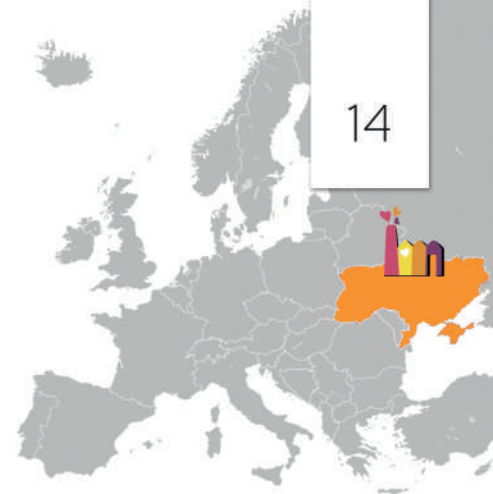

WE FEED

WE TREAT

SINCE
2022

14

Our coordination achievements

We continue building **bridges between people in need and effective aid**. We work together with international organizations, UN agencies, local NGOs, and public authorities to create a system in which **no call for help goes unanswered**.

Thanks to this cooperation, our aid can reach further and **make a real difference in the lives of thousands of people**.

Modern Referral Tool

In 2025, we implemented a unique **tool for safely referring people between different forms of support**. The system harmonizes aid criteria and is already **being used by national and international organizations** working in the fields of healthcare and cash assistance. This technology turns chaos into precise coordination, making a real difference in the daily lives of people in need.

Expert legal and tax support

Together with the Legal Task Team, **we developed key guidelines** addressing the legal, tax, and data protection complexities involved in humanitarian aid. Through professional training sessions and workshops, **we reached more than 1,000 people working in the sector**, helping organizations operate effectively, transparently, and responsibly toward the communities they serve.

Support

dobrafabryka.pl/en/ukraine

Innovative Emergency Fund

In 2025, we launched **the one-of-a-kind Emergency Fund** project, a **support mechanism for local Ukrainian humanitarian organizations**.

We provide them with a personalized support package that includes **equipment, training, specialist consultations**, and, most importantly, **support for their teams**. These are people who, despite living **under constant shelling** and **enduring hours-long power outages**, continue helping others every single day.

November 2025

Registration of patients in a frontline town. We provided medical assistance in emergency cases as well as support for people with chronic illnesses.

The total cost of aid provided in Ukraine in 2025 amounted to

1 150 570 zł

Language Ladder

A ladder to the future

On April 10, 2025, Dobra Fabryka began working on a groundbreaking **18-month international project**. The “Language Ladder” initiative is co-funded by the European Union through the **Social Innovation Fund+**.

Our goal is to create an innovative **support model for young people** aged 13 to 18 who came to Poland and Estonia as a result of the war. We focus on modern education, **language integration**, and building **future career prospects** for young people whose development was suddenly interrupted by **the trauma of displacement**.

Key achievements and activities in 2025:

- **Summer Academy in Kraków:** In July and August 2025, we organized an intensive program for 40 young people, combining Polish and English language learning with workshops focused on developing future-ready skills.
- **Ongoing educational support:** Since November 2025, we have been supporting more than 100 secondary school students. We provide classes in mathematics, Polish, and English, helping young people prepare for their matura exam.

Co-funded by
the European Union

Social
Innovation 
Initiative

- **Psychosocial support:** The project is not just about education. Above all, it provides a safe space where young people can build peer relationships and regain a sense of agency and self-confidence.
- **International consortium:** We work side by side with the Estonian Refugee Council and Tallinn University, combining practical experience with academic expertise to develop a support model that can be implemented across Europe.

We believe that by investing in these young people today, we are not only helping close educational gaps, but also **building a more supportive and cohesive society**. Thanks to the trust of major grant providers and the support of our donors, we plan to expand the program in 2026 to include vocational workshops for another 240 teenagers.

Barata

A young patient in the cardiology ward of our hospital in Ntamugenga.

Democratic Republic of the Congo

Hospital in Ntamugenga

WE TREAT

In the heart of North Kivu, we run **a hospital** that remains **the only lifeline to the outside world for thousands of people**. In 2025, when fighting cut the region off from mobile networks and plunged it into communication silence, **the support of our donors ensured that Ntamugenga did not run out of medicines, electricity or connectivity**. In a place where every form of contact requires a dangerous journey across the front line, the support of our donors preserved hope and safety.

Hospital in numbers:

- We received **12,840 patients** for outpatient consultations and hospitalized **3,570 people**.
- We treated around **6,200 malaria patients**, including **3,750 children** under the age of five.
- We performed **321 life-saving surgeries**, including cesarean sections, operations for peritonitis, and spleen removals, as well as more than **3,400 minor surgical procedures**.
- We carried out **375 blood transfusions** and assisted with **820 births**.
- We diagnosed **tuberculosis in 138 people**, 60 of whom have already been fully cured.

In July 2025, Sister Agnieszka Gugąła, director of the hospital and nutrition center in Ntamugenga, was awarded the Knight's Cross of the Order of Polonia Restituta for her unwavering service under wartime conditions.

In 2025, we focused on **modern diagnostic methods** that are virtually inaccessible in this region. We carried out more than 350 ultrasound examinations and sent over 50 **specialist laboratory tests** abroad, including histopathology and virology analyses, **to effectively treat the most complex cases**.

We provide **palliative care** for patients with cancer and kidney failure. Over the past year, more than 20 people received not only professional **pain management** and chemotherapy, but also clothing and dignified living conditions during the final stage of their lives.

We pull patients back from death, one by one. **Thank you for every euro you donate**, allowing us to bring help where war tries to take away people's hope.

Fund malaria treatment

dobrafabryka.pl/en/malaria

May 9, 2025

We support Clemence in her daily rehabilitation and her fight against paralysis of the entire body.

September 15, 2025

We purchased a new examination chair for the hospital's patients.

Purchases for the hospital

Over the past year, we focused on **modernizing key areas of the hospital's operations** to provide patients with a standard of care we could previously only dream of.

- **Modern operating room:** We equipped it with a professional stainless steel operating table that allows patients to be positioned freely during surgery, as well as a new surgical lamp providing perfect illumination of the operating field. These replaced old equipment damaged by rust and humidity.
- **Starlink connectivity:** We installed satellite internet, which became the region's only connection to the outside world after ongoing fighting cut off mobile networks. It provides a sense of safety for both staff and residents.
- **Solar power supply:** We purchased two refrigerators for storing milk, along with a dedicated solar power system that ensures a constant energy supply.
- **Specialist education:** We funded a four-year degree program in anesthesiology and resuscitation for our nurse, Philippe. This is an investment in medical staff that directly improves patient safety during operations.

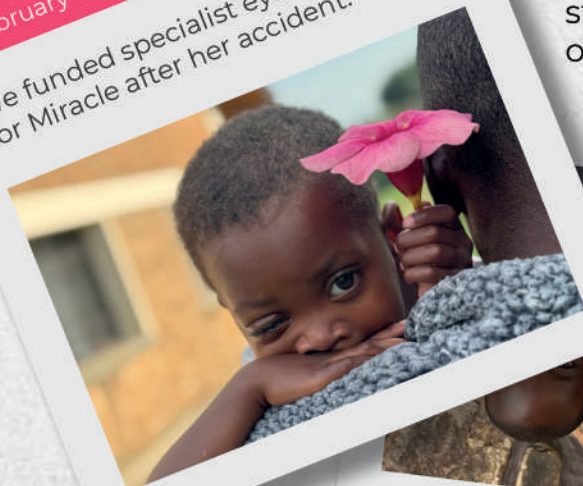

April 11, 2025

The daily reality on the Congolese roads and trails we use to transport medicines and patients.

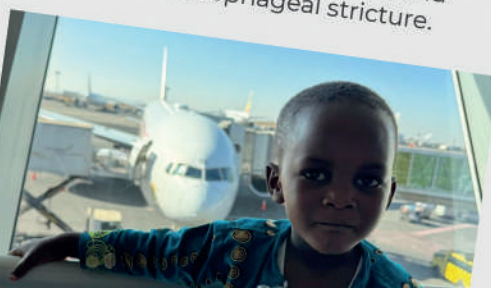

February 10, 2025

We funded specialist eye treatment for Miracle after her accident.

February 25, 2025

Thanks to our donors, Safari was flown out for life-saving examinations and treatment for esophageal stricture.

September 9, 2025

We installed a modern surgical lamp in the operating room.

October 14, 2025

We took in siblings whose mother had died.

Ongoing work

Despite difficult external conditions, we continue to ensure the uninterrupted operation of the hospital's and village's key infrastructure.

- **Plumbing repairs:** We provided logistical and material support for more than 20 repairs to the village water system, which includes 5 kilometers of piping. Thanks to this, for the first time in the hospital's history, we did not run out of water even for a single minute.
- **Maintenance of solar installations:** We carry out regular inspections of the panels and network, cleaning them and replacing parts exposed to rust and dust. Thanks to the support of our donors, two technicians continuously oversee the efficiency of our charging systems.
- **Logistical support for patients:** We monitor the process of qualifying patients for specialist procedures. One example was the risky journey to Kinshasa to obtain a passport for little Jikaze, which was necessary for his surgery abroad.

October 15, 2025

A patient from our hospital who won her battle with tuberculosis.

December 27, 2025

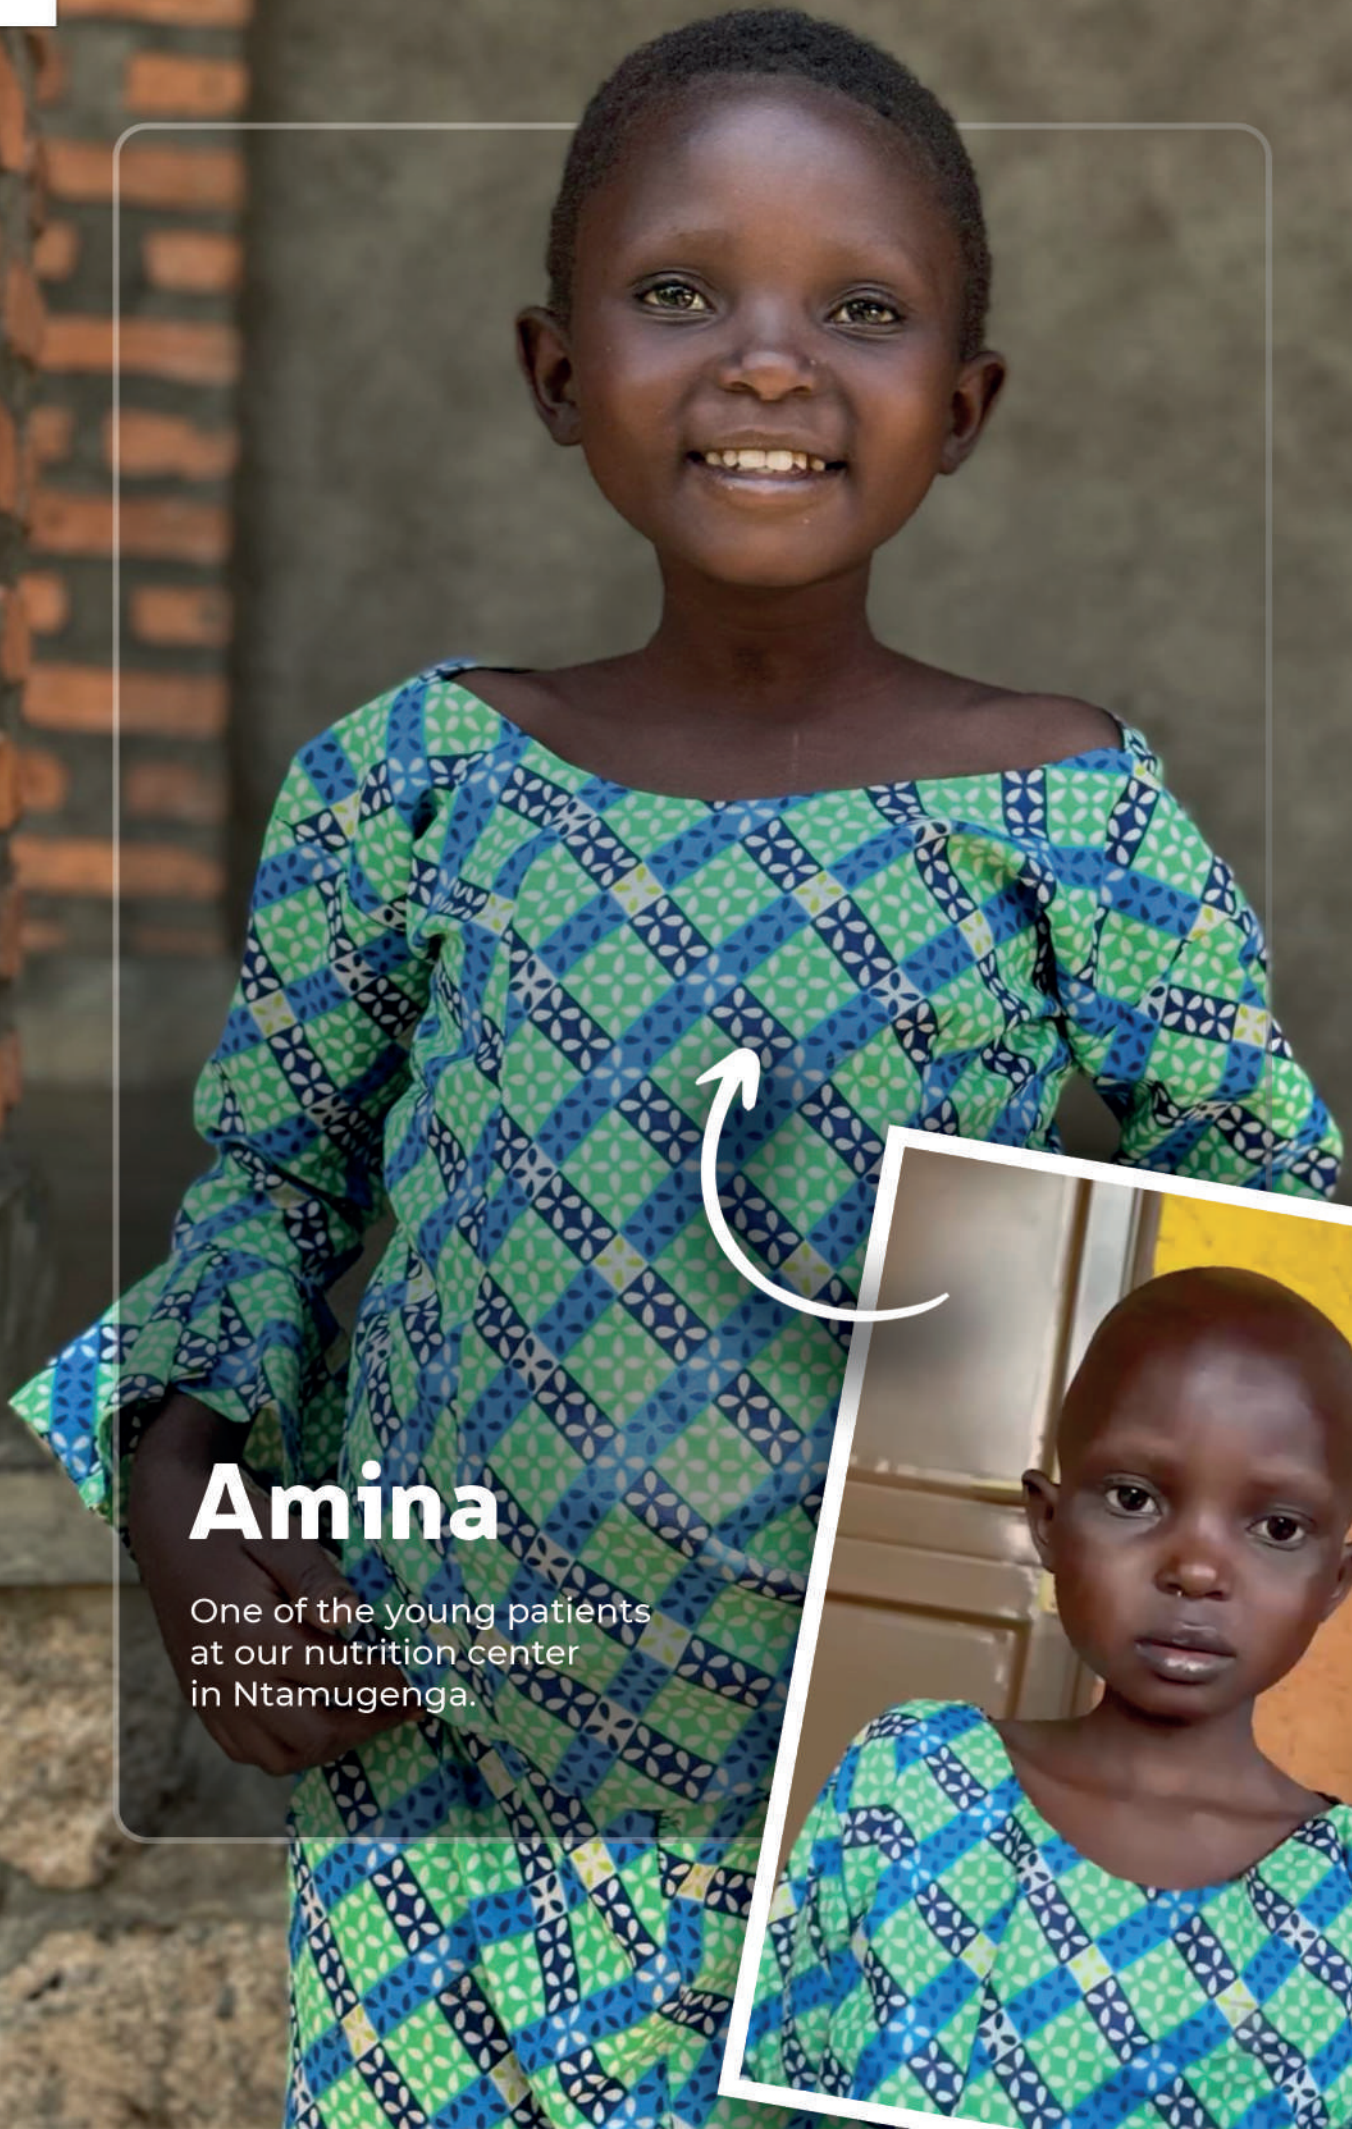

A patient's recovery after hand surgery following severe burns.

December 20, 2025

One of the precise hand surgeries performed in our hospital.

Amina

One of the young patients
at our nutrition center
in Ntamugenga.

Democratic Republic of the Congo

Nutrition Center in Ntamugenga

In the conflict-ridden province of North Kivu in the Democratic Republic of the Congo, **the nutrition center in Ntamugenga** remains one of the few facilities that **continues to save children suffering from severe malnutrition.**

Despite the volatile situation and disrupted supply chains, **we did not interrupt our aid efforts for even a moment.**

Thanks to the support of our Foundation, the center never runs out of **F-75 and F-100 therapeutic milk**, which form the basis of treatment for severe malnutrition.

We also provide **all the necessary nutritional products** used in therapy, allowing our youngest patients to recover safely.

A new **investment in the solar power system supplying the cold storage** facility allows us to safely store milk and therapeutic food even during frequent power outages.

Thanks to **the support of Dobra Fabryka donors**, patients at the center receive free diagnostics, treatment, nutritional therapy, clean clothing, and hygiene products.

Treating severe malnutrition in Ntamugenga remains our priority. **We never turn anyone away.**

Our results in numbers:

In 2025, we helped 114 children recover from severe acute malnutrition and 401 children from moderate malnutrition.

Each week, we care for around 80 of our youngest patients.

Donate a therapeutic meal

dobrafabryka.pl/en/meal

In 2025, our support for the hospital and nutrition center in Ntamugenga amounted to

€215 578

Hospice in Kabuga

WE TREAT

SINCE
2014

**Gift a day of care
in the hospice**

[dobrafabryka.pl
/en/hospice](https://dobrafabryka.pl/en/hospice)

Dobra Fabryka supports **the only hospice in Rwanda**, run by the Sisters of Angels. Here, terminally ill patients find **dignity** instead of loneliness, and orphaned children find **a safe home**.

Our results in numbers:

- We provided specialist care to **37 patients in very serious condition**.
- We welcomed **20 new patients**, supporting them through the most difficult moments.
- We provide **care and support for 24 children** of staff members, deceased patients, and families living in poverty.
- Thanks to the support of our donors, we purchased **20 modern beds** with anti-bedsores mattresses.
- We **renovated patients' rooms** and purchased **a new gas stove** for the hospice kitchen.

In 2025, the hospice became a true refuge for those with no one to care for them. **Two children** now live at the facility permanently: Aimable, who lost his parents, and Anitha, the daughter of our late patient Marie-Louise. We fund their **education in schools** in Kabuga, **daily meals** and everyday expenses.

Christine

**A patient at the
hospice in Kabuga**

Felicite

A patient at the hospice in Kabuga

In 2025, support for the hospice in Kabuga amounted to

€96 926

In addition, **we rent two houses** that provide a roof over the heads of **those most in need**. In the first one, three **children of a deceased patient** live under the care of a guardian. In the second one, two boys aged 3 and 7 whose **father is battling a serious illness** have found shelter. Thanks to our support, the brothers are able **to attend preschool regularly**.

Despite immense suffering, our patients receive **dignified care in professional conditions** at the hospice. Our hospice in Kabuga is a place where life is lived fully until the very end.

Burkina Faso

Agricultural Project in the Village of Gourcy

WE TEACH

WE PROVIDE
JOBS

SINCE
2016

In the small village of Gourcy in northern Burkina Faso, we established **an agricultural cooperative**, funded **a mill** and **a vegetable garden**, dug wells, opened **a tailoring school**, and taught people how to read, write, and count. All of this was done **to provide work for dozens of families** living in difficult, near-desert conditions.

A few years ago, we began helping the residents of Gourcy by teaching them entrepreneurship and providing them with the tools they needed **to become more self-reliant**.

It all began in 2016 with a simple starter kit. Ten families, selected by our missionary Małgosia Tomaszewska, received livestock from us, along with animal enclosures we built for them.

We also provided our beneficiaries with grain for sowing and tools for cultivating the fields, together with one instruction: that **good should be multiplied**.

The task was simple. After one year, each family was expected to **pass the good forward** by supporting another family in need **with a similar set of resources**. Their first responsibility was to grow and multiply what they had received by **expanding their livestock**, harvesting **crops**, and developing their farms so they could **flourish**.

Everything they managed to produce beyond what they passed on became their own profit.

Today, dozens of families are already taking part in the project, and we have every reason to be proud. The project continues to grow, **bringing more good** to this small village every year.

We provide work for 52 families who cultivate the vegetable garden we established.

The vegetable garden in 2025:

Although Gourcy remains a “red zone” on the safety map, 2025 was a year of intense work.

Despite extreme weather conditions and disease reducing the harvest, our garden remained a lifeline for 52 families.

We gathered crops that allowed us to purchase more seeds, while part of the income was used to support the 1% microloan fund.

In 2025, 9 families benefited from the program, investing, among other things, in livestock and their children's education.

**Donate tools
for work**

[dobrafabryka.pl
/en/tools](https://dobrafabryka.pl/en/tools)

Burkina Faso

Investment in the vegetable garden's development

WE TEACH

WE PROVIDE JOBS

In the **Dobra Fabryka vegetable garden** in Gourcy, Burkina Faso, **52 families worked in 2025**, developing their own farms and sources of income through a shared agricultural project. Our goal is to build local entrepreneurship in **a region affected by poverty, climate change**, and a volatile safety situation.

Over the past few years, we have created **an agricultural cooperative, a mill, a vegetable garden, and a tailoring school** where local residents can learn a profession and **gain basic entrepreneurial skills**. The entire project is based on the principle of **"passing good forward."** The first families received livestock, tools, and grain for sowing, with the understanding that **after one year they would pass on the multiplied resources to other families in need**.

On 3 hectares of land, we created **a vegetable garden with eight wells**, including two deep wells, as well as an **irrigation system** powered by solar energy. **The vegetables grown here are sold at local markets** and help provide food for local residents.

Our goal is not only to improve living conditions in a single village. The project is designed to help communities adapt to **the effects of climate change and counter migration** by creating jobs in places where there were previously no prospects at all. Thanks to the investments we have made, we are able **to green more parts of this increasingly desertified region** and increase food production in Gourcy.

Our project remains a foundation of food security and **provides work for dozens of families**.

December 2025

As every year, we organized a Christmas celebration for the families.

March 2025

The harvest from the vegetable garden in Gourcy is not only food for 52 families, but also income and independence earned through their own work.

January 2025

For five years, the Bark-Wende family has continuously cared for the safety and development of the vegetable garden in Gourcy.

In 2025, our support for the project in Burkina Faso amounted to

€53 124

Burkina Faso

Education for children and adults

SINCE
2016

WE TEACH

WE PROVIDE
JOBS

In September 2025, we provided **school kits** for **22 children from the poorest families** in Gourcy. High-quality backpacks and school supplies sent from Poland **enabled them to start the new school year.**

Without support, education for children from the poorest families would be **an unattainable luxury.**

Our school is **not just theory.** In the vegetable garden in Gourcy, 52 families are expanding their **knowledge of crop cultivation, tree planting, and animal care.** These are essential skills in the Sahel region. Children of the families we support are also introduced to practical **knowledge of basic agriculture.** In this way, we help them **grow up with a culture of environmental responsibility.**

School kit

DOBRA
FABRYKA

**We reduce economic barriers
to access to education.**

In a country where only about 45% of people over the age of 15 can read, practical skills provide a real chance to support oneself and one's family.

In October 2025, **10 new girls** began a **three-year sewing school program**. Currently, **34 students** are training in our workshop across three levels of education.

In June 2025, **three top graduates**, after passing their exams, **received sewing machines** from us and opened their own workshops. The girls also **learn entrepreneurship**.

They **produce** and sell **cleaning products**, funding the upkeep of the workshop. All participants also **attend literacy classes**.

In Senegal, **learning a profession** is often the only real path for young women to achieve independence and escape poverty. Our school serves as the **missing link between education and the labor market**.

All Foyer graduates who completed their training in 2025 **found employment within just one day**. Thanks to professional job placement coordinated by Marie Etienne, **employers begin lining up** as early as 4 a.m. **to hire our graduates**.

In 2025, a total of **8 women** worked in the **cooperative founded by Dobra Fabryka** (7 graduates and the manager).

Across two locations (Medina and Keur Massar), we run:

- **2 sewing and embroidery workshops** equipped with professional machines.
- **2 catering units** (event catering, special orders, and meals for students).
- **A boutique and a beauty and hairdressing service point.**

Employment guarantee

100% of graduates of our school receive a job offer.

Building self-sufficiency

The workshops **have completed hundreds of orders**, including 300 polo shirts, 400 pencil case embroideries, and 118 sweatshirts. **Liturgical garments** were the most successful product line (10 chasubles and 14 stoles), and also the most profitable part of the business. The profits cover ongoing expenses and **working capital**, making the project **self-sustaining**.

In 2025, our support
for the project in
Senegal amounted to

€18 108

Safe Haven

The only center in Nouakchott that provides children with disabilities with access to development and rehabilitation opportunities.

SINCE
2018

In Mauritania, where **children with disabilities** are often “invisible” to society, an extraordinary place has been operating for years: Foyer de l'Enfance in Nouakchott. It is **a safe haven** that provides care where public support is lacking. **In winter 2025, Dobra Fabryka officially joined this mission.**

Our visit in November confirmed a partnership aimed at ensuring **sustainable support** for the center and enabling it to expand the scale of its assistance.

Mauritania

Center for children with disabilities in Nouakchott

WE FEED

Although Foyer has been operating for a long time, it **lacked stable funding.**

Our involvement as a partner has already brought tangible results: thanks to donor support, we hired a **physiotherapist**, which directly **increased the number of children able to access rehabilitation.**

Throughout 2025, the center provided care to 385 registered children.

In 2025, with financial support from Dobra Fabryka, the center provided:

- **Rehabilitation:** sessions for 75 children
- **Nutrition support:** 480 food packages for 40 families
- **Medical care:** access to medication for 54 children
- **Development therapy:** daily sessions for a group of 18 children

In 2025, we allocated funds to support the center for children with disabilities amounting to

€16 745

In Mauritania, a **child with a disability** is often a shameful **family secret kept hidden**. Mothers, blamed for their children's condition, **live in complete isolation**. Foyer de l'Enfance is the only place that brings them out of this shadow.

One of our beneficiaries did not leave her home with her son for years, **fearing the judgmental looks** of her neighbors.

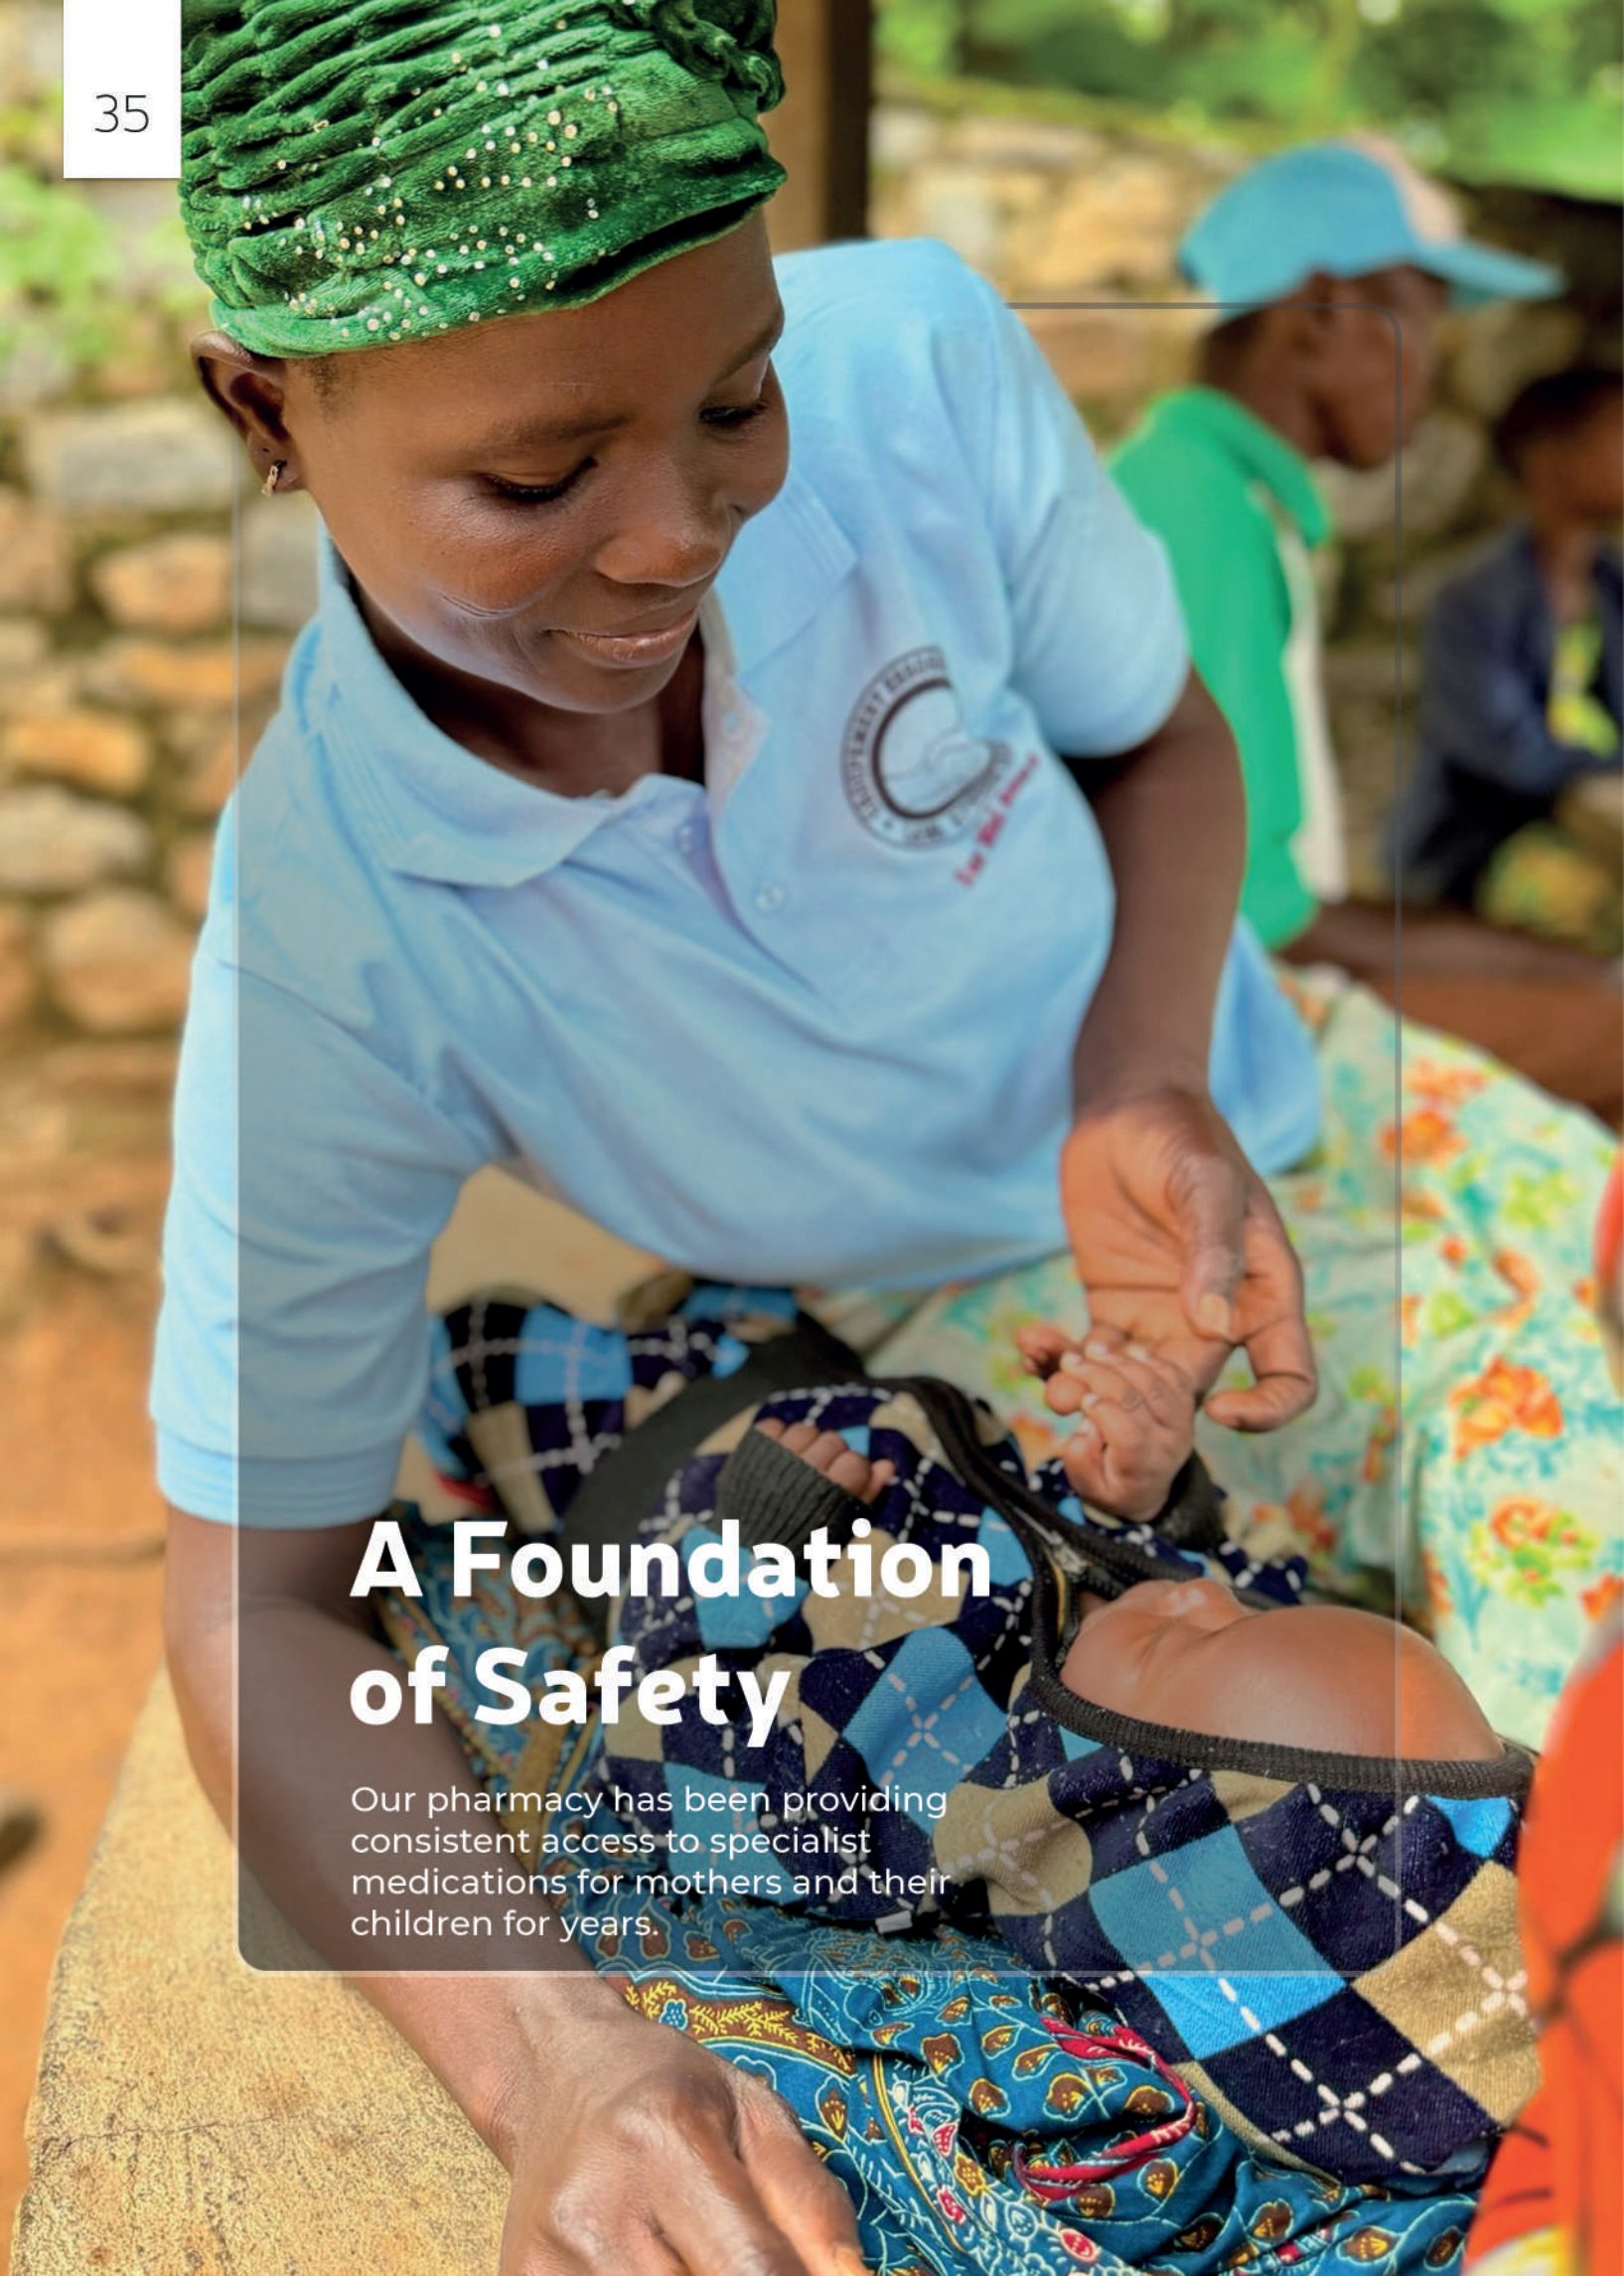

At the center, she received not only **rehabilitation support for her son**, but also her own **sewing machine**. She found a group of **women facing similar challenges**. As one of **12 graduates** of a sewing course, she gained independence. Today, she no longer needs to beg for charity; she has a skill and her own income. **She has regained confidence and dignity.**

The **presence of Dobra Fabryka** in Nouakchott is, for her and hundreds of other families, **a guarantee** that when medicine runs out or strength fades, **they will not be left alone** with their problems. **Together with you, we are building a foundation of stability they have never known before.**

A Foundation of Safety

Our pharmacy has been providing consistent access to specialist medications for mothers and their children for years.

Togo

SINCE
2016

Pharmacy in Saoudé

WE TREAT

Help fund medications

dobrafabryka.pl/en/pharmacy

Our pharmacy in Saoudé has been operating continuously since 1956. For many patients, it is the only place where they can **pay for medicine with grain instead of cash**, which they often lack. This form of distribution makes medical care **accessible to every resident** of the region.

In 2025, our support reached **a record 4,350 patients**. Regular medicine deliveries every three months, along with a telephone ordering system, allow us to maintain a steady supply of **antibiotics, vitamins, and specialist medications**.

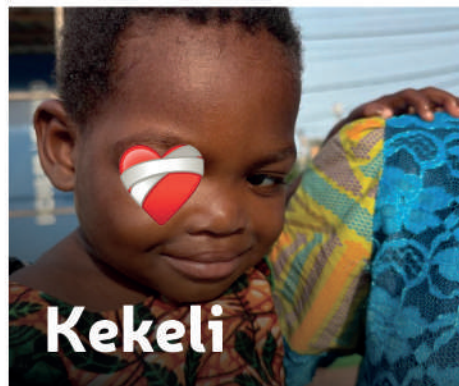

We are continuing **a major expansion project** announced last year. Following initial **architectural assessments**, the project entered a **key formal phase** in June 2025. We have already submitted the necessary documentation to the authorities and are now, after consultations with specialists, **awaiting final approvals** to physically expand the facility.

In 2025, we allocated a total of funding for the pharmacy in Togo amounting to

€8 697

A **2-year-old girl** from the village of Tchamdé. She first came to the pharmacy as an infant when her mother had no milk. Thanks to regular support in the form of **food packages with milk and porridge**, her weight is consistently monitored and remains within a healthy range.

Kekeli

A **17-month-old girl** was born with a **congenital eye defect**. In November, we funded **detailed diagnostics**, including an eye CT scan and electroretinography. We are preparing Kekeli for **surgery to remove the eye** and fit a **prosthesis**, scheduled after a consultation in January 2026. We cover all costs of her **examinations and treatment**.

Regine

Since 2022, she has been under **continuous psychiatric care**, which has led to a significant improvement and **stabilization of her health**. We **treated her gynecological conditions** and funded an eye examination as well as prescription glasses. Regine takes her medication regularly, and **all costs of her treatment** are covered by Dobra Fabryka.

Bangladesh

SINCE
2018

Rohingya refugee camp • Project for families

WE FEED

In 2025, Dobra Fabryka continued supporting families living in the **world's largest refugee settlement**, near **Cox's Bazar** in Bangladesh. It is one of the most densely populated places on Earth, where **up to 40,000 people live per square kilometer**. If Poland were populated at the same density, it could hold around 12.5 billion people, several billion more than the current global population.

Effects of Natural Disasters

The camp is regularly affected by exceptionally intense **monsoon rains**. As a result of floods and landslides, **over 43,000 residents have lost their homes**. Makeshift shelters built on cleared, sandy slopes are easily destroyed by heavy rainfall, causing **widespread damage**. The problem is that Rohingya refugees are not allowed to build safer alternatives.

Supplementing Basic Food Aid

The **World Food Programme (WFP)** supports refugees with food vouchers worth 12 USD per month, which is only enough for a **very limited set of basic products**.

Dobra Fabryka provides additional food support to the most vulnerable families when basic assistance is not sufficient. We supplement a poor diet with more nutritious products, **helping sick and elderly residents of the camp**.

Education and Healthcare Despite Limitations

The Government of Bangladesh **restricts refugees' access to formal education** and freedom of movement outside the camp. For this reason, **we support parents in providing their children with basic informal education**, mainly in madrasas and with private teachers.

Our assistance also enables families to respond to **urgent health needs** by covering the costs of **emergency medical consultations, treatment, and medicines**. This ensures that **sick individuals do not have to wait for lengthy administrative procedures** that delay access to healthcare.

2025

Thanks to your support, 15 children from the families we assist are learning English and Burmese, building opportunities for a life beyond the camp.

In 2025, we allocated a total of funding for Rohingya families amounting to

€11 395

Charbel

Together with his brother, who is visually impaired, he runs a small farm and a shop, which is their only source of income.

Lebanon

SINCE
2021

Pharmacy for Those in Need

WE TREAT

In crisis-stricken Lebanon, **Dobra Fabryka has for years been the closest support for those whom the world has forgotten.**

In 2025, **our activities in Lebanon reached an unprecedented scale.** Thanks to donor support, we have significantly **improved the lives of hundreds of people** for whom living through a prolonged crisis has meant a daily struggle for survival.

“Our goal has always been to **save the lives of chronically ill patients** by providing them with medicines that are unaffordable in Lebanon,” says Dr. Elias Harouny.

Dr Elias, a dentist and head of the association “L’Aventure de la Charité”, has been a cornerstone of local aid efforts for years. Together, in 2025, we provided **ongoing care to 250 patients**, regularly delivering life-saving medicines. In addition, **we supported 1,100 emergency medical cases.**

Our joint achievements in 2025:

- **Medicine security:** We provided medications for 250 chronically ill patients and funded costly specialist treatments, including for Crohn’s disease and osteoporosis.

- **Senior nutrition:** We distributed food packages to 180 families and provided vouchers for bread and fresh vegetables to several dozen more.
- **Warm homes:** We delivered 120 liters of heating oil to 65 families to help them get through the winter, and covered rent arrears, preventing eviction for two families.
- **Education and dignity:** 50 students received school bags and supplies, and 70 families were able to purchase new clothing thanks to vouchers for a shopping center.

In helping others, it is always about encounter. Loneliness means that even a simple conversation with another person becomes medicine in itself. I visit the sick as a friend, ready to listen.

Elias Harouny • Founder of the “Adventure of Charity” association

Doumith and Charbel are **blind brothers** who, with remarkable determination, **run their own vegetable and fruit farm** as well as a small shop. Despite losing their sight completely, their **strong will** and hard work in agriculture amaze the entire local community.

In June and July, we purchased **produce from them, which was delivered to 70 of the poorest families.** By supporting them, we gave them not only an income but also a sense that their work truly matters. **Charbel, who suffers from Crohn’s disease**, has also become a beneficiary of our support.

Thanks to donors, **we funded essential injections**, each costing as much as 800 dollars. Without this support, his daily struggle with illness and pain would have been impossible to sustain.

Lebanon

A Christmas to Remember

SINCE
2021

Support
the Lebanese

dobrafabryka.pl/en/lebanon

In the shadow of **the deepest crisis in the country's history**, we organized a **special Christmas gathering** for the first time for our beneficiaries and their caregivers.

The festive lunch was attended by the **Ambassador of Poland to Lebanon**, giving the event a level of recognition that our sick and impoverished friends had never experienced before. For people who, on a daily basis, **feel invisible** and pushed to the margins, it was **a moment of restored dignity** and a sense that someone remembers them.

Thanks to donors, we were able to fund:

- **A festive meal and Christmas packages** with food and sweets for all invited guests.
- **Medical safety kits**, containing essential medicines for each of our **250 regular beneficiaries**.
- **Individual gifts**, which for many were the only presents they had received in years.

Smile in The Box

Together with the Smile in the Box initiative, we helped make the Lebanese winter a little warmer. **We focused on the youngest**, providing them not only with material support but also with reasons to smile. We funded **hundreds of kits** containing **clothing, hygiene products, toys, and educational materials**. Our presence during Christmas activities and Santa Claus visits allowed children to **forget, even for a moment, the hardships of everyday life** and to experience a sense of carefree childhood again.

In 2025, we allocated a total
of funding for the Lebanon project
amounting to

€44 323

Partnerships

At Dobra Fabryka, we believe that real change happens when we act together. Everything we do is made possible thanks to the extraordinary generosity of individuals, companies, organizations, and institutions that support us and with whom we work on an ongoing basis.

From Poland With Dev

**FROM
POLAND**
WITHDEV.COM

**Custom software, eCommerce solutions,
and web design.**

In the world of new technologies, much is said about their potential to change the world for the better. However, the team at **From Poland With Dev** does not stop at words. They are practitioners who turn knowledge into action - creating **solutions that truly matter**.

Our paths crossed a few years ago, and **we immediately felt that this would be something special**.

They are more than just IT experts. From the very beginning, they have been our partners - supporting us through every turn of our digital transformation.

It didn't end with simply migrating our website. They gave us the **tools and knowledge that enabled us to operate independently**. They developed a system for distributing meals to refugees in Lesbos, supported us during the pandemic, and helped with crisis response efforts in Ukraine.

But what truly sets them apart is the heart they put into their work.

This is not a relationship based on a contract. **It is a collaboration between people driven by the same purpose - to help others.**

They are a team that is truly present - they organize fundraising campaigns, visit us at our office, and **actively look for new ways to offer support**. They motivate us to grow, share their experience, and give us the courage to create even more good together.

From Poland With Dev has become part of our family - **a team of sharp minds and big hearts** who use technology to create lasting change.

We are deeply grateful that we can walk this path together.

**Innovation
that matters**

Tomasz & Dariusz

Synergy Oil Polska

Engine oils, lubricants, automotive fluids,
and industrial-scale distribution

Some people do more than support a good cause —they become part of it.

From the very first visit Tomek and Darek made to our office, we knew they were not ordinary entrepreneurs. They are **business leaders and experts in entrepreneurship**, marketing, and sales - but above all, mentors willing to share their knowledge. They are also friends who **stood by us through every challenge that 2024 and 2025 brought**.

SynergyOil, founded by **Tomasz Wawrzyn** and **Dariusz Mitura**, supports us in developing campaigns and advises us on creating new humanitarian projects.

Whenever we face challenges in communication, we know **we can always turn to them for advice.**

They do far more than share their expertise - they actively **invest in our growth.** By funding **training programs** and connecting us with top specialists, Dariusz and Tomasz **help our team gain new skills** and operate even more effectively.

Thanks to their ongoing commitment to **strengthening the Dobra Fabryka team**, our impact continues to grow month by month - we are reaching more people and changing more lives.

Their generosity speaks for itself. They invested in the development of our social media communications, which enabled us to raise an **impressive €47,443** - funds that **provided over 13,430 therapeutic meals for children suffering from severe malnutrition** in the Democratic Republic of the Congo

Their impact goes far beyond numbers. It is the people whose lives they have changed, the opportunities they have created, and the hope they continue to carry forward.
